DESCRIPTION

The CE687 piezoelectric accelerometer with integrated electronics from Meggitt's vibro-meter® product line is a general-purpose vibration sensor designed for the monitoring and protection of machinery in harsh industrial environments.

The CE687 is an industry standard 4 to 20 mA loop-powered vibration sensor (vibration transmitter) that provides a vibration output signal in a current loop. It is available with a sensitivity of 4 to 20 mA proportional to 0 to 10 g or 0 to 20 g.

The CE687 is available as a sensor only or fitted with an integral cable that is protected by a stainless-steel overbraid. Sensor only versions allow one of a range of different cable assemblies to be used to connect the sensor to the monitoring system, depending on the application and environment.

The CE687 is available in standard versions for use in standard (non-hazardous) areas only.

For specific applications, contact your local Meggitt representative.
