

XS-D SERIES

High stroke-to-length ratio LVDT

SPECIFICATIONS

- Excellent stroke-to-length ratio
- Lower weights than other standard LVDTs with comparable displacement ranges
- Stroke ranges from ± 1 to ± 10 inches
- Shock and vibration tolerant
- Stainless steel housing
- Magnetically shielded
- Imperial or metric threaded core

The **XS-D Series** LVDTs are specifically designed for measuring relatively large displacements where installation space is limited. The XS-D Series have a substantially greater displacement range than other standard LVDTs, but without the accompanying increase in body length and weight. Using special coil winding techniques, the XS-D permits linear range measurements of up to 80% of the housing length.

Compact, shock and vibration tolerant, and featuring infinite resolution and repeatability, the XS-D Series are the perfect choice for servo mechanisms, linear potentiometer replacement, or wherever precise displacement measurements are required in space restrictive applications. All models are supplied with a calibration certificate, and are available with either an imperial or metric threaded core. The XS-D Series are compatible with all Measurement Specialties LVDT signal conditioners, controllers and readouts.

Like in most of our LVDTs, the XS-D windings are vacuum impregnated with a specially formulated, high temperature, flexible resin, and the coil assembly is potted inside its housing with a two-component epoxy. This provides excellent protection against hostile environments such as high humidity, vibration and shock.

FEATURES

- Superior stroke-to-length ratio
- Stroke ranges from ± 1 to ± 10 inches
- Smooth transfer function
- AISI 400 Series stainless steel housing
- Calibration certificate supplied with all units

APPLICATIONS

- Servo mechanisms
- Hydraulic actuators
- Linear potentiometer replacement
- Space restrictive installations
- Weight sensitive applications

High stroke-to-length ratio LVDT

PERFORMANCE SPECIFICATIONS

ELECTRICAL SPECIFICATIONS					
Parameter	XS-D 1002	XS-D 2002	XS-D 3002	XS-D 5002	XS-D 10002
Stroke range	±1 [±25.4]	±2 [±50.8]	±3 [±76.2]	±5 [±127]	±10 [±254]
Sensitivity V/V/inch [mV/V/mm]	0.28 [11.0]	0.16 [6.3]	0.12 [4.7]	0.13 [5.1]	0.05 [2.0]
Output at stroke ends (*)	280mV/V	320mV/V	360mV/V	650mV/V	500mV/V
Phase shift	+30°	+25°	+7°	+0.5°	-4°
Input impedance (PRIMARY)	175Ω	243Ω	266Ω	968Ω	628Ω
Output impedance (SECONDARY)	230Ω	103Ω	220Ω	532Ω	416Ω
Non-linearity	±2.0% of FR, maximum				
Input voltage	3 VRMS sine wave				
Test input frequency	2.5kHz				
Input frequency range	400Hz to 3kHz				
Null voltage	0.5% of FRO, maximum				

ENVIRONMENTAL SPECIFICATIONS & MATERIALS	
Operating temperature	-65°F to +300°F [-55°C to 150°C]
Shock survival	1,000 g (11ms half-sine)
Vibration tolerance	20 g up to 2KHz
Housing material	AISI 410 Series stainless steel
Electrical connection	Six lead-wires, stranded 28 AWG, PTFE insulated, 1 foot [0.3m] long
IEC 60529 rating	IP61

Notes:*Dimensions are in inch [mm]**All values are nominal unless otherwise noted**Electrical specifications are for the test frequency indicated in the table**(*): Unit for output at stroke ends is millivolt per volt of excitation (input voltage)**FR: Full Range is the stroke range, end to end; FR=2xS for ±S stroke range**FRO (Full Range Output): Algebraic difference in outputs measured at the ends of the range*
